THE PEOPLE YOU KNOW, THE OUTCOME YOU EXPECT.

PegasusTSI provides Engineering, Procurement and Construction Management services to both domestic and

international markets. Our company's legacy is founded on the extensive experience and ability of our people to understand and respond to our Clients' needs.

At PegasusTSI we execute projects of all sizes from engineering studies to large EPC assignments in either grassroots or retrofit environments.

This wide range of services, along with the tools, expertise and flexibility of our people, allows us to assist our clients in delivering exceptional results for their projects.

Today's industry is faced with unprecedented demands and competition for funds to support capital investments. Global market competition, increased ROI demands and regulatory influences have

created the need for "A Different Kind of Contractor."

PROVEN EXPERIENCE.

Over the last 30 years the PegasusTSI team has provided EPCm services for more than 75 large scale fertilizer projects around the world. Our process engineering staff has extensive experience in designing new plants, pilot plants, revamping existing facilities and scale up / commercialization of processes for the fertilizer industry. As a result, our core fertilizer team's experience includes projects in the United States, and in the Middle East, Latin America, Australia, South Africa and China.

PEOPLE AND PROJECTS TAKEN FURTHER.

*"The high quality of engineering provided by Mustang (now PegasusTSI) played an important role in SF's realization of a 10%+ savings in total project cost."
SF Phosphates*

ONE TEAM. MANY SOLUTIONS.

The mission of PegasusTSI is to fully embrace our Clients' business goals. By melding the talents of our team into a seamless and cohesive unit, we will deliver innovative solutions in the process and industrial market that achieve our Clients' goals. We will aspire to be our Clients' Contractor of Choice and inspire total confidence in our brand through our unrelenting commitment to quality services in the domestic and international marketplace.
