

power & energy

EXPERIENCED PEOPLE • EXCEPTIONAL PROJECTS

FERTILIZERS • POLYMERS & CHEMICALS • PETROCHEMICALS • OIL REFINING • PHARMACEUTICALS • CONSUMER PRODUCTS • ENVIRONMENTAL INDUSTRIAL & MANUFACTURING • METALS & MINERALS • PULP & PAPER • POWER & ENERGY

PegasusTSI offers a unique blend of experience in power generation, heat recovery & integration, and chemical/refining processes. Our projects include flue gas scrubbing systems, heat recovery and integration, coal gasification, fuel and bulk material handling, carbon sequestration and retrofit to add cogeneration.

PROCESS SYNERGY

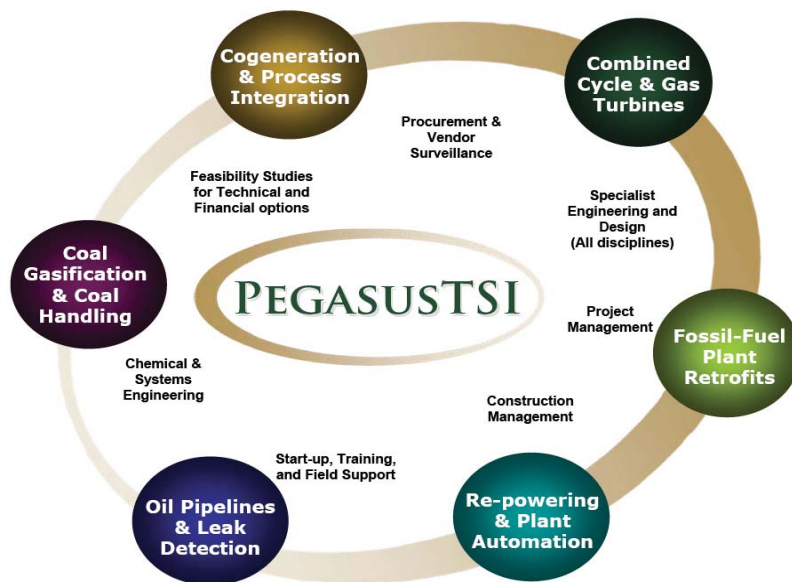

Production & distribution of electricity and steam are fundamental components in all utility and process plants. In most of the process markets we serve - Petroleum Refining, Pulp & Paper, Chemicals, and Industrial manufacturing - the “Energy Islands” of these facilities are part of our scope. This aspect keeps us constantly involved in Power Generation design, procurement and construction activities.

Today, the power generation and process industries are extremely competitive. PegasusTSI welcomes the

challenge of these market-driven projects. High fuel prices, plant siting issues, limits on stack emissions and concern about CO2

revamp an existing power facility.

PegasusTSI offers “best in class” services for detailed design, where the use of automated design systems enhances our efficiency and the quality of our deliverables. PegasusTSI projects have employed PDS 3D modeling, design review and construction techniques, which have helped to achieve significant schedule and budget savings.

& SO2 require creative thinking. Our versatility and broad experience enable us to provide our clients with all the necessary services to build a grassroots facility or

EXPERIENCED STAFF

Our engineering, project management and construction management professionals work together as a close-knit team with our clients throughout the duration of the project, providing the responsiveness, control and single source accountability needed for successful completion of your project. PegasusTSI’s commitment to our power clients and clients with power needs throughout the project is exemplified in our repeat client base, which illustrates the value provided by PegasusTSI and the satisfaction expressed by our “returning” customers.
